3. Irregularity, infringement, fraud, other issue and suspicion thereof (hereinafter "irregularity")

Title:	Non_compliant fertilisers labelled "for use in organic production" imported from China with high level of ammonium nitrogen
Description:	Many fertilisers imported from China with high level of ammonium nitrogen were controlled on the French market and declared non-compliant with regulation 2021/1165, considered as ammonium stillage : Azopril N13, Nova N12-0-3 , Orgamax 15-5-0-2, Solferti 11-0-5, Solferti 7-0-7-S. These products are suspected to be on the European market under different names and distributed by European operators to organic sector (see the table enclosed)
Seriousness assessment:	the high level of ammoniacal nitrogen in these products >50% related to nitrogen total see the labels enclosed
Actors already informed:	French operators

Detection Context

Date:	30/04/2023
Place:	
Person/body detecting the irregularity:	DGCCRF : National Investigation Service
EU legislation at stake (reference(s)):	RUE 2018/848, RUE 2021/1165

4. Product traceability**Description**

Name: See the table enclosed

Brand / trade name:

Other aspects: See the table enclosed

Consignment

Consignment / lot / delivery number:

Country of origin: CHINA

Total net / gross weight, volume:

Other information:

Supply chain – description of operators

Name	Type	Contact Details	Control body/authority (with contact details)
------	------	-----------------	---

5. Measures taken**Blocking product**

Basis: Mandatory

Date: 30/04/2023

Quantities:

Other measures

Description: French authority have ordered the operators concerned to removal the label "for use to organic production" on the products.
The product Orgamax was considered not compliant with the fertiliser rules : it does not correspond to any européenne category or standart rules and no marketing authorisation was delivered. The withdrawal from the market was ordored

6. Other information

The alert is addressed to all Members States in order to inform about these non compliant fertilisers suspected to be used to organic production and to take the appropriate measures on the market and on the organic production.
